Napotki:

**Before we begin – in order to start playing, you need to make sure that you’ve created a team and split into the three routes, or you won’t have all of the required information!**

**Welcome!**

**While walking through the desert, you found a mysterious pyramid.**

**You’ve already seen enough movies about people who investigate mysterious pyramids, and it has never ended well, so you’ve decided to completely ignore all of that knowledge, and investigate the pyramid!**

**The pyramid has three entrances – red, green and blue. You chose to split between the entrances, and investigate the secrets and mystery of the structure!**

**In order to reach the top of the pyramid, you need to solve 9 puzzles. But – you are split into three teams.**

**In order to succeed, the three teams need to work together. It’s important for you to communicate, in order to solve all of the puzzles.**

**But, in this game, you can not show your screens to one another, and you can’t play in-game recordings/videos to one another. On the other hand, you can talk, describe the screen to one another, and be creative, in order to progress in the game!**

**Important – always read everything that’s on your page, sometimes the story contains information that may help you!**

**If you are not in the same place, we recommend that you’ll find a way to communicate with the other teams, like Zoom.**

**In addition, you should use a software that allows you to write and draw in the same place, in order to convey information between you comfortably.**

**One of the websites of the type is:**

**<https://aggie.io/>**

**But there are many other similar websites!**

**The game is 1 hour long.**

**Two final things:**

- \* Some part of the game may require using Google, that is totally allowed!**
- \* We suggest that only one of the team will be responsible of taking hints when needed, so you will be able to keep track of your points.**

**Make sure you can communicate with the other teams, and lets go!**

**Srečno!**
